Art Unit: 1746

1.

2. Claims 8 and 10 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on December 20, 2005.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 2, 4 and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either Holden (U. S. Pat. No. 2,498,737) or Scarpa (U. S. Pat. No. 3,433,461).

Re claim 2, for example Holden and Scarpa are each cited disclosing an ultrasonic vibrator comprising: a vibrating portion; a side wall portion standing on the principal surface of said vibrating portion; and a vibrator body disposed on the principal surface of said vibrating portion inside said side wall portion so as to apply ultrasonic vibration to said vibrating portion, wherein a thin portion (28 in Holden and 3a, 4 in Scarpa) is formed at least on a part of the border between said vibrating portion and said side wall portion. Re claims 4, note Holden col. 4, line 29 thru col. 5, line 17. Re claims 6, Holden and Scarpa disclose the frequency in the ultrasonic range (generally above 20kHz) and therefore the frequency range as claimed is therefore believed to be taught by the prior art.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In Ellner, Cook, Gander, Pedziwitar et al., Shwartzman et al., and Benioff, note the vibrators.
